

- Köşegenleştirilebilir Matrislerin Kuvvetleri -

A köşegenleştirilebilir bir kare matris olmak üzere $B = P^{-1}AP$ olsun.

$$B = \begin{pmatrix} \lambda_1 & 0 & 0 & \dots & 0 \\ 0 & \lambda_2 & 0 & \dots & 0 \\ 0 & 0 & \lambda_3 & \dots & 0 \\ \vdots & \vdots & \vdots & \ddots & \vdots \\ 0 & 0 & 0 & \dots & \lambda_n \end{pmatrix}_{n \times n}$$

köşegen

• A^2 için :

$$\begin{aligned} B^2 &= (P^{-1}AP)^2 \Rightarrow B^2 = P^{-1}AP \overset{I}{P^{-1}AP} \\ &= P^{-1}A \overset{I}{I} P \\ &= P^{-1}A^2P \end{aligned} \quad \begin{aligned} P B^2 &= P P^{-1} A^2 P \\ P B^2 P^{-1} &= A^2 P P^{-1} \end{aligned}$$

$$\Rightarrow \boxed{A^2 = P \cdot B^2 \cdot P^{-1}} \Rightarrow A^2 = P \cdot \begin{pmatrix} \lambda_1^2 & & 0 \\ & \lambda_2^2 & \\ 0 & & \ddots \\ & & & \lambda_n^2 \end{pmatrix} P^{-1}$$

• A^3 için :

$$B^3 = (P^{-1}AP)^3 = P^{-1}AP \cdot P^{-1}AP \cdot P^{-1}AP = P^{-1}A^3P \Rightarrow \boxed{A^3 = P B^3 P^{-1}}$$

⋮

• A^k için ($k \in \mathbb{N}$) :

$$B^k = P^{-1}A^kP \Rightarrow \boxed{A^k = P \cdot B^k \cdot P^{-1}} \text{ olur.}$$

ÖR : $A = \begin{pmatrix} 5 & 0 \\ 3 & 2 \end{pmatrix}$ için A^{10} hesaplayınız.

Cözüm :

$$(\lambda - 2)(\lambda - 5) = 0 \Rightarrow$$

$$\lambda = 5$$

$$p_2 = \begin{pmatrix} 1 \\ 1 \end{pmatrix}$$

$$\lambda = 2$$

$$p_1 = \begin{pmatrix} 0 \\ 1 \end{pmatrix}$$

$$\Rightarrow P = \begin{pmatrix} 1 & 0 \\ 1 & 1 \end{pmatrix} \Rightarrow P^{-1} = \begin{pmatrix} 1 & 0 \\ -1 & 1 \end{pmatrix} \text{ olup}$$

$$B = P^{-1}AP \Rightarrow B = \begin{pmatrix} 1 & 0 \\ -1 & 1 \end{pmatrix} \begin{pmatrix} 5 & 0 \\ 3 & 2 \end{pmatrix} \begin{pmatrix} 1 & 0 \\ 1 & 1 \end{pmatrix}$$

$$A^k = P \cdot B^k \cdot P^{-1} \quad \boxed{B = \begin{pmatrix} 5 & 0 \\ 0 & 2 \end{pmatrix} \checkmark} \Rightarrow B^{10} = \begin{pmatrix} 5^{10} & 0 \\ 0 & 2^{10} \end{pmatrix}$$

$$\Rightarrow B^{10} = P^{-1} \cdot A^{10} \cdot P$$

$$\Rightarrow \boxed{A^{10} = P \cdot B^{10} \cdot P^{-1}}$$

$$= \begin{pmatrix} 1 & 0 \\ 1 & 1 \end{pmatrix} \begin{pmatrix} 5^{10} & 0 \\ 0 & 2^{10} \end{pmatrix} \begin{pmatrix} 1 & 0 \\ -1 & 1 \end{pmatrix}$$

$$= \begin{pmatrix} 5^{10} & 0 \\ 5^{10} & 2^{10} \end{pmatrix} \begin{pmatrix} 1 & 0 \\ -1 & 1 \end{pmatrix}$$

$$= \begin{pmatrix} 5^{10} & 0 \\ 5^{10} - 2^{10} & 2^{10} \end{pmatrix} = \begin{pmatrix} 9765625 & 0 \\ 9764601 & 1024 \end{pmatrix} \#$$
